SISTEMAS DE AQUECIMENTO RADIANTE

Este sistema de aquecimento é composto por painéis leves, retardantes de chama, com 0,5 mm de espessura, de diferentes dimensões, com baixa potência e alta eficiência.

Os painéis trabalham com temperaturas radiantes médias de certa consideração, podendo utilizar temperaturas do ar relativamente baixas com a economia que isso supõe, especialmente para repor as perdas por renovação ou infiltração do ar.

COMPATÍVEIS COM PAINÉIS SOLARES

Sistema 100% ecológico, pode ser ligado a uma aplicação para regular os horários consoante a necessidade e a painéis solares para aproveitar energia renovável.

ESPECIFICAÇÕES TÉCNICAS

Para que o sistema de aquecimento seja confortável, a temperatura dos painéis de aquecimento não deve exceder determinados limites (65°C-70°C). A temperatura ambiente recomendada é de 22°C, e 18°C nos quartos e casas de banho. **Em caso algum a temperatura deverá ultrapassar os 30°C.**

Os micro painéis colados às paredes interiores têm uma superfície por painel de 1,2m², 1,6m² e 2,0m² com uma espessura de 0,5mm e são aquecidos através do fornecimento de energia elétrica e de baixo consumo (de 550W a 1000W dependendo das dimensões do painel). Desta forma a emissão de calor é produzida por radiação suave para o meio aquecido.

SYSTÈMES DE CHAUFFAGE RADIANT

Ce système de chauffage est composé de panneaux légers, ignifuges, de 0,5 mm d'épaisseur, de différentes dimensions, à faible puissance et à haut rendement.

Les panneaux fonctionnent avec des températures radiantes moyennes d'un certain degré, et peuvent utiliser des températures d'air relativement basses avec les économies que cela comporte, notamment pour remplacer les pertes dues au renouvellement de l'air ou à l'infiltration.

COMPATIBLE AVEC LES PANNEAUX SOLAIRES

Système 100% écologique, peut être connecté à une application pour réguler les horaires selon les besoins et à des panneaux solaires pour profiter des énergies renouvelables.

SPÉCIFICATIONS TECHNIQUES

Pour que le système de chauffage soit confortable, la température des panneaux chauffants ne doit pas dépasser certaines limites (65°C-70°C). La température ambiante recommandée est de 22°C et de 18°C dans les chambres et les salles de bains. **En aucun cas la température ne doit dépasser 30°C.**

Les micro panneaux collés sur les parois intérieures ont une surface par panneau de 1,2m², 1,6m² et 2,0m² avec une épaisseur de 0,5mm et sont chauffés par apport d'énergie électrique à faible consommation (de 550W à 1000W selon les dimensions du panneau). De cette manière, l'émission de chaleur est produite par un rayonnement doux vers le milieu ou l'espace à chauffer.

RADIANT HEATING SYSTEMS

This heating system is composed of lightweight, flame retardant panels, 0.5 mm thickness, of different dimensions, with low power and high efficiency.

The panels work with average radiant temperatures of a certain degree, and can use relatively low air temperatures with the savings that this entails, especially to replace losses due to air renewal or infiltration.

COMPATIBLE WITH SOLAR PANELS

100% ecological system, can be connected to an app to regulate schedules as needed and to solar panels to take advantage of renewable energy.

TECHNICAL SPECIFICATIONS

For the heating system to be comfortable, the temperature of the heating panels must not exceed certain limits (65°C-70°C). The recommended room temperature is 22°C, and 18°C in bedrooms and bathrooms. **Under no circumstances should the temperature exceed 30°C.**

The micro panels glued to the internal walls have a surface area per panel of 1.2m², 1.6m² and 2.0m² with a thickness of 0.5mm and are heated by the supply of low-consumption electrical energy (from 550W to 1000W depending on the dimensions of the panel). In this way, heat emission is produced by gentle radiation to the heated medium.

SISTEMAS DE CALEFACCIÓN RADIANTE

Este sistema de calefacción está compuesto por paneles ligeros, ignífugos, de 0,5 mm de espesor, de diferentes dimensiones, de bajo consumo y alta eficiencia.

Los paneles trabajan con temperaturas radiantes medias de un determinado grado, pudiendo utilizar temperaturas del aire relativamente bajas con el ahorro que ello supone, sobre todo para reponer pérdidas por renovación o infiltración de aire.

COMPATIBLE CON PANELES SOLARES

Sistema 100% ecológico, conectable a app para regular horarios según necesidad y a paneles solares para aprovechar energía renovable.

Especificaciones técnicas

Para que el sistema de calefacción sea confortable la temperatura de los paneles calefactores no debe superar ciertos límites (65°C-70°C). La temperatura recomendada en las habitaciones es de 22°C, y de 18°C en dormitorios y baños. **En ningún caso la temperatura debe superar los 30°C.**

Los micropaneles pegados a las paredes internas tienen una superficie por panel de 1,2m², 1,6m² y 2,0m² con un espesor de 0,5 mm y se calientan mediante el suministro de energía eléctrica de bajo consumo (de 550W a 1000W dependiendo de las dimensiones del panel). De esta manera se produce una emisión de calor mediante una suave radiación hacia el medio calentado.

Manutenção e limpeza

As bases de chuveiro podem ser limpas com a maioria dos produtos de limpeza. Recomenda-se usar uma esponja e água com sabão para limpar a base de chuveiro. Nunca use uma esponja abrasiva.

Maintenance and cleaning

Shower trays can be cleaned with almost all common cleaning products. It is recommended to use a sponge and soapy water to clean the shower tray. Never use abrasive sponge.

Entretien et nettoyage

Les bacs à douche peuvent être nettoyés avec presque tous les produits de nettoyage courants. Il est recommandé d'utiliser une éponge et de l'eau savonneuse pour nettoyer le receveur de douche. Ne jamais utiliser d'éponge abrasive.

Mantenimiento y limpieza

Los platos de ducha se pueden limpiar con casi todos los productos de limpieza corrientes. Es recomendado utilizar una esponja y agua jabonosa para la limpieza del plato de ducha. Jamás utilizar esponja abrasiva.

IMPORTANTE:

Se necessitar de desentupir o sifão ou os tubos de evacuação, tenha atenção para não salpicar os produtos contendo ácido sulfúrico ou soda cáustica na base de chuveiro. Recomenda-se usar um funil para despejar este tipo de produto diretamente no sifão. Esses produtos podem danificar irreversivelmente a superfície da base de chuveiro.

IMPORTANT:

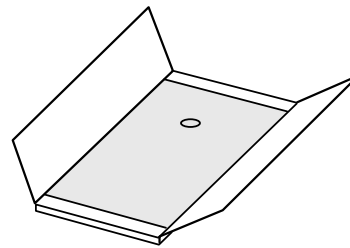

If you must unclog the siphon or the evacuation tubes, it is very important to be careful not to overturn the shower tray. products containing sulfuric acid or caustic soda. It is recommended to use a funnel to pour this type of product directly into the siphon. These products could irreversibly damage the surface of the shower tray.

IMPORTANT:

Si vous devez déboucher le siphon ou les tuyaux d'évacuation, il est très important de veiller à ne pas jeter les produits contenant de l'acide sulfurique ou de la soude caustique sur le receveur de la douche. Il est recommandé d'utiliser un entonnoir pour verser ce type de produit directement dans le siphon. Ces produits pourraient endommager de manière irréversible la surface du receveur de douche.

IMPORTANTE:

Si deben desatascar el sifón o los tubos de evacuación, es muy importante tener cuidado de no volcar sobre el plato de ducha los productos que contiene ácido sulfúrico o sosa cáustica. Es recomendado utilizar un embudo para echar este tipo de producto directamente en el sifón. Estos productos podrían dañar de manera irreversible la superficie del plato de ducha.

Antes da instalação

Verifique o estado da base de chuveiro e verifique se corresponde à cor e acabamento selecionados. Antes da instalação, a base deve ser sempre armazenada na horizontal ou na vertical, nunca em ângulo, pois isso pode deformá-la. Todas as bases de chuveiro podem ser cortadas com um disco de diamante radial. A peça cortada nunca terá o mesmo acabamento que os outros lados, pelo que a zona cortada deve ser aplicada em direção à parede. Não é aconselhável colocar a base de chuveiro sobre suportes/pernas. Isso pode deformar a base e, nesse caso, perderá a garantia.

Before installation

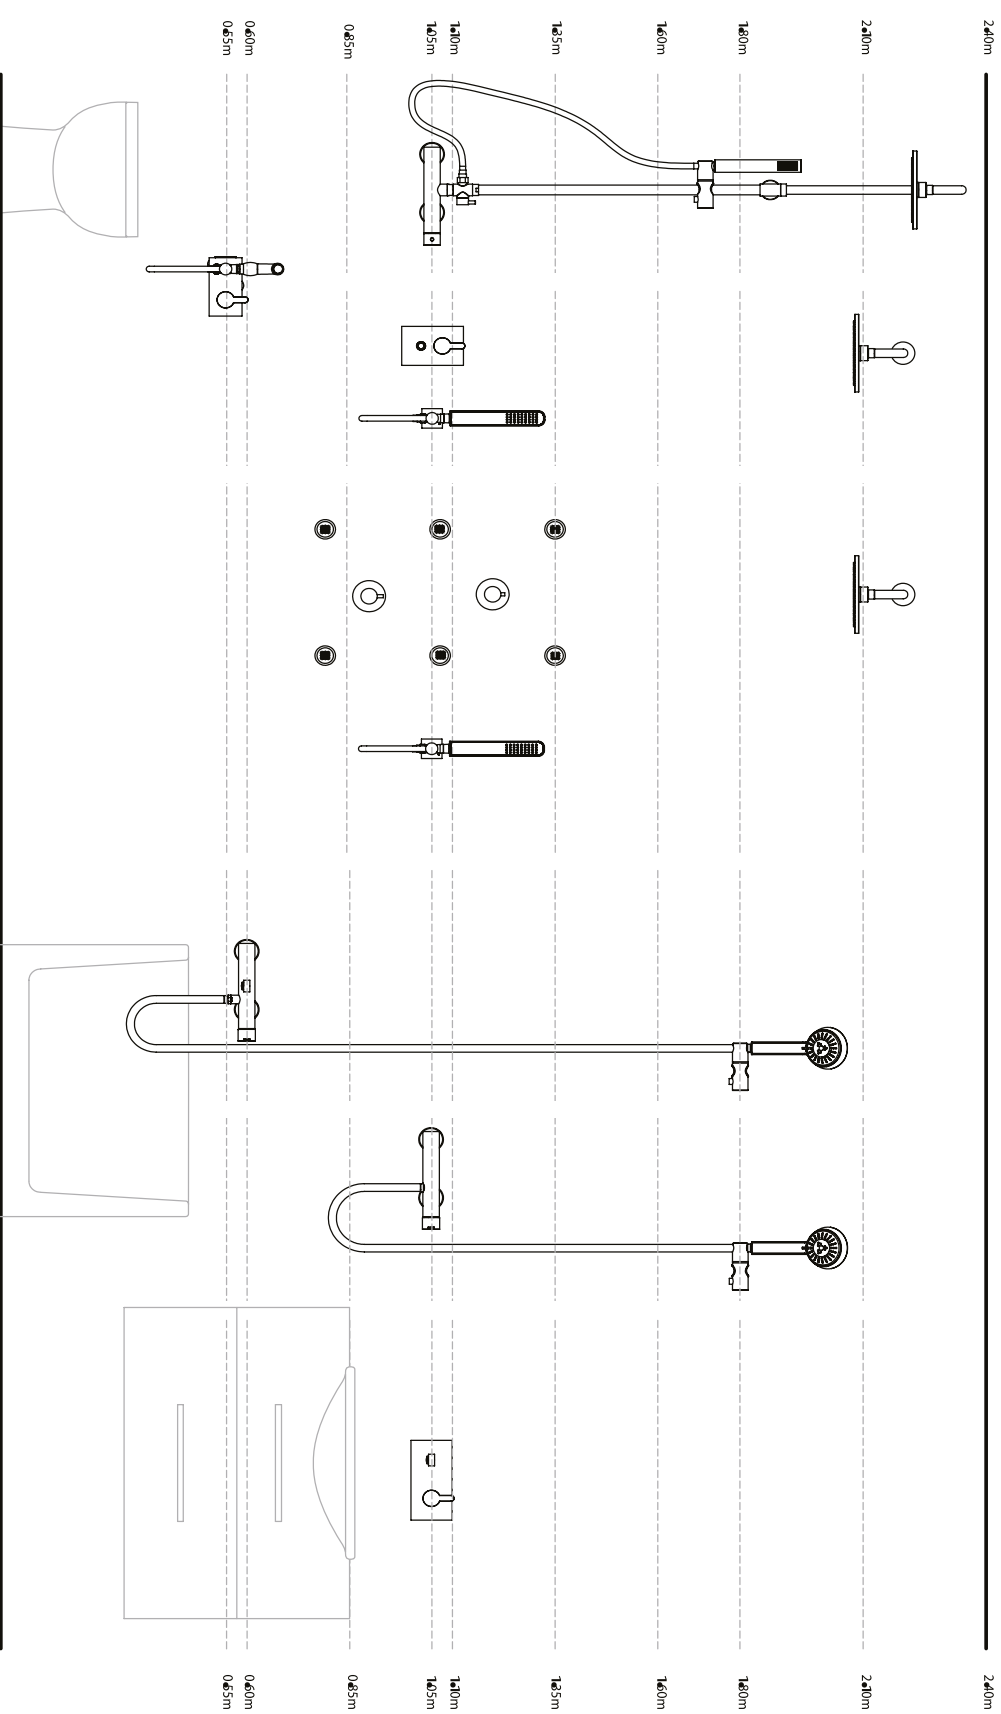

Check the correct condition of the shower tray and verify that it corresponds to the color and the selected color. Before installation the plate should always be stored horizontally or vertically, but never making an angle, as this could deform it. All shower trays can be cut with a diamond disc radial. The cut part will never have the same finish as the other sides, so the cut part should go towards the wall. It is not advisable to put the shower tray on legs/suports. This could deform the plate and in this case, it would lose the guarantee.

Avant l'installation

Vérifiez le bon état du receveur et assurez-vous qu'il correspond à la couleur et à la dimation sélectionnées. Avant l'installation, le receveur doit toujours être stockée horizontalement ou verticalement, mais jamais un angle, cela pourrait la déformer. Tous les bacs à douche peuvent être coupés avec un disque en diamant radial. La partie coupée n'aura jamais la même finition que les autres côtés, elle doit donc aller vers le mur. Il n'est pas conseillé de poser le receveur de douche sur les pieds. Cela pourrait déformer le receveur et dans ce cas, la garantie serait perdue.

Antes de la instalación

Controlar el correcto estado del plato de ducha y verificar que corresponde al cabado y al color escogido. Antes de su instalación el plato debe ser almacenado siempre en horizontal o vertical, pero nunca haciendo ángulo, pues esto podría deformarlo. Todos los platos de ducha pueden ser recortados con una radial con disco diamante. La parte cortada jamás tendrá el mismo acabado que los otros lados, por eso la parte cortada debe ir hacia la pared. No es recomendable poner el plato de ducha sobre patas. Esto podría deformar el plato y en este caso, perdería la garantía.
